

MINN KOTA

UNIVERSAL SONAR 2

A Universal Sonar 2 adapter plug will allow you to quickly and conveniently connect and disconnect your motor from your fish finder. Shielded cable connections virtually eliminate the possibility of sonar interference and are waterproof for extra dependability. Universal Sonar 2's state-of-the-art, integrated and protected transducer is built into the lower unit of the motor and all wiring runs inside the indestructible composite shaft - out of sight and out of harm's way. No clamps. No ties. No exposed wires or connections. You get optimal sonar performance to help you find fish.

REQUIRED ACCESSORY ADAPTER FOR UNIVERSAL SONAR 2 EQUIPPED TROLLING MOTORS:

HUMMINBIRD PIRANHAMAX™ SERIES

MODEL	US2 CABLE
PiranhaMAX 155	MKR-US2 8

NOTE: Minn Kota motors with built-in Universal Sonar 2 (including those with i-Pilot Link) are not compatible with Humminbird's Down Imaging Sonar. An external XTM 9 WIDE DI 20 T (83/200) or XTM 9 DI 25T (200/455) is required for all sonar readings with all HELIX 12 , HELIX 10, HELIX 9, 1100, 900, and 800 Humminbird Down Imaging units. An external XTM 9 DI 25T transducer would be required for the Down Imaging versions of the HELIX 7 and HELIX 5 along with the 788ci HD DI.
